PodPods Vape Device User Guide

Version: 202106

mypodpods.com

Thanks for purchasing a PodPods Vape Device. Please read this guide before use. Keep this guide for future reference.

What's included?

- 1x PodPods battery/device
- 1x USB charge lead
- 1x User Guide

How to use your device

To get the best performance out of your PodPods device it should be fully charged before use.

Remove the PodPods cartridge from its foil pack and insert into the top of the PodPods device. You will feel it click into place.

Close your lips around the tip of the cartridge and gently inhale.

The device will automatically activate as you puff, the LED will light up then gently fade out. You may hear some crackling as the device heats up - this is normal.

When the LED flashes 10x while vaping it's time to charge your device. Using the supplied charge lead plug the device into a computer USB port.

When to change the cartridge

It's time to change the PodPods cartridge when the device stops producing vapour or when the quality of the vapour or taste deteriorates.

If the PodPods device stops producing vapour before the cartridge is empty check the battery is fully charged.

Charging instructions

Only use the supplied USB charging lead.

Only ever connect to a safety extra-low voltage (SELV) circuit e.g. a USB port on a computer. Never charge from a high current USB outlet such a phone charger.

Never leave your device unattended while charging.

Plug the micro USB end of the charge lead into the PodPods device and the other end into a suitable USB outlet on a computer or laptop. The LED will light solid while charging.

Once fully charged the LED will flash 20x then the LED will go out.

Specifications and features

- Your PodPods device can be used while it is charging
- If the device is over used/vaped for more than 10 seconds the LED will flash 2x and the device will shut down
- Short circuit/over current protection is included
- The device includes a non-replaceable 250mAh internal battery
- Smart charging circuitry prevents the battery over charging.

Battery fully charged	20x LED flashes
Short circuit protection	LED on for 2 seconds
Over current protection	LED on for 2 seconds
Unplugged from charger	3x LED flashes

Tips, tricks and warnings

- Each PodPods cartridge is only designed to be used once. Do not attempt to refill the cartridge as it will likely result in leakage and damage to your PodPods device.
- Check the PodPods device for any e-liquid leakage each time a new pod is inserted. Clean and dry the device immediately.
- Do not allow the device to get wet. Humidity and rain can cause the device components to corrode.
- Do not use if there is any sign of damage to the device or cartridge.
- **THIS PRODUCT CONTAINS NICOTINE WHICH IS AN ADDICTIVE SUBSTANCE.**
- **KEEP OUT OF REACH OF CHILDREN AND ANIMALS.**
- **IF LIQUID IS SWALLOWED RINSE MOUTH WELL WITH WATER.**

- IF YOU GET LIQUID ON YOUR SKIN WASH WITH SOAP AND WATER.
- CALL A POISON CENTRE IF YOU FEEL UNWELL.
